

we listen and respond to your IT needs ...

Improving our clients' information assets with our team-oriented...needs-driven...results-based solutions is the key to our successful track record. Our team of highly experienced specialists is recognized for their commitment to customer service and contributions to technological advancement using industry/international standards.

APPLICATION DEVELOPMENT

Our wide range of services allows us to provide a complete IT solution. From initial consultation to final installation, CLMS works closely with our clients through the development process. We manage a wide range of project types and sizes and can deliver a high-quality system in a timely, cost efficient manner. Our information technology solutions span the entire system lifecycle, including business process design, system analysis and design, system development and integration, and operations and maintenance. CLMS is experienced in analyzing legacy source code to determine functionality, extract requirements, and define the underlying business rules. Our services include:

- Business process modeling
- Data modeling
- Data standardization
- Migration from legacy systems to client server architecture
- Documentation
- User training

PROJECT MANAGEMENT

Our project management solutions combine strategic, technical, operational, and organizational expertise with proven, disciplined approaches to build solutions that get results. Sharing best practices contributes to the efficiency, creativity and innovation of an organization. Our PM goal is to capture and reuse knowledge, and to share it among all levels of an organization. The CLMS project management staff assists organizations in the capture and communication of this knowledge and help clients build knowledge infrastructures and implement knowledge-based projects. We customize our approach to meet your unique needs. Our services include:

- Change management
- Planning and scheduling
- Coordinating resources for plan implementation
- Overseeing PM processes and tracking results
- Standardized status reporting

...innovative IT solutions tailored for your environment

DATABASE MANAGEMENT

CLMS works with all major databases, including Oracle. We can provide expertise in all principle languages and development tools, including Oracle Designer7, Oracle Developer, Oracle PL/SQL, SQL Plus, and many others. Our services include:

- Custom application development
- Application upgrades
- Application setup and configuration
- Database administration
- Production deployment
- Post production support

SYSTEMS ENGINEERING

The CLMS Systems engineering staff has extensive UNIX and NT system administration and networking experience. Our senior technicians have worked with multiple versions of UNIX including AT&T version V BSD versions, Sun Solaris, SCO UNIX, DYNIX, XENIX, Linux, IBM AIX, and Compaq Tru64 UNIX (Digital UNIX). This experience includes supporting nationwide UNIX networks with 30,000 plus users and terabyte size storage systems. Our services include:

- Installation
- Configuration and tuning
- Backup/restore automation
- Training customized for administrators, operators, and end users
- Systems integration for UNIX, Windows NT 4/2000 Server, Novell NetWare, and Cisco routers and switches
- UNIX and Internet security configuration
- Risk analysis and network security in LAN/WAN environments

NETWORK MANAGEMENT SERVICES

CLMS Network Management Services offers a full suite of networking options that opens up the lines of communication between your employees/clients and mission-critical data and applications. We'll support your networking environment whether you need remote monitoring, design, deployment, or total maintenance of your system. Today's enterprise needs a complex yet smoothly functioning network in order to communicate internally among valued producers, to empower sales personnel, and to enhance customer loyalty. CLMS Network Management Services offers powerful solutions to the challenges of owning and managing today's information systems. Our services include:

- Field service
- Asset management
- Help desk user support
- Systems management
- Network management
- Training programs

CLMS Commercial Price List

Coordinates and monitors the scheduling, pricing, and technical performance of company programs.

Responsibilities also include aiding in the negotiation of contracts and contractual changes and coordinating

Associates Degree is equivalent to 3 yrs specialized experience Bachelors Degree is equivalent to 4 year Experience Masters Degree is equivalent to 2 yrs Experience PhD is equivalent to 2 yrs Experience

preparations of proposals, plans, specifications, and financial conditions of contracts. Develops new business and expands product line. Ensures adherence to master plans and schedules, develops solutions to program problems, and directs work of incumbents assigned to program from various departments. Ensures projects are completed on time and within budget. Acts as advisor to program team regarding projects, tasks, and operations. Familiar with standard concepts, practices, and procedures within a particular field. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complex tasks. A certain degree of creativity and latitude is required. Typically reports to a unit/department head.

Program Managel

Minimum Experience:

Minimum Experience:

Six (6) years of progressive experience

Eight (8) years of progressive experience

Minimum Education:

- Bachelor's degree in a related scientific or technical discipline.
- No Degree must have 13 yrs of ITrelated and progressive management experience

Rate \$350.00

ject Manager

Responsible for the coordination and completion of projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status of project. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.

Software/Systems Architect

Designs architectures that include software, hardware, and communications solutions to support total requirements, as well as provide for present and future cross-functional requirements and interfaces. Ensures architectures are in compliance with open systems standards as they apply to the client's environment. Evaluates compatibility of information system development efforts with agency architectures and recommends adjustments, as appropriate. Evaluates problems of workflow, organization, and planning and develops appropriate corrective action.

Minimum/General Experience: Five years of Information technology experience and three years of specialized experience.

Minimum Education:

- Bachelor's degree in a related scientific, engineering or technical discipline.
- No Degree must have 8 yrs of general experience with 5 years IT related

Rate \$150.00

Internet Engineer - Level 3	Analyzes, studies, and designs TCP/IP networks and systems. Works with Internet protocols, gateways, firewalls, routers, switches, servers, clients, streaming, messaging, transactions, and database backends. Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes, and throughput) and recommends procurement, removals, and modifications to network components. Designs and optimizes network topologies and site configurations. May provide Internet database design and modeling. Plans installations, transitions, and cutovers of network components and capabilities. May review existing network and database designs and capabilities with the goal of making refinements, reducing operating overhead, enhancing network throughput, and improving current network topologies. May function as team leader for less experienced Internet Engineers.				
Level 3	Minimum Education: Minimum/General Experience: Five years of experience in information technology and/or various network components associated with TCP/IP networks.
